

Proficy* Accelerator for Production Efficiency

30 days to a better bottom line

In today's challenging economic climate, manufacturers need to reduce their capital investment, optimize asset utilization and maximize return from resources. To achieve these goals, you need a proven solution that enables your operations to be extremely efficient, highly flexible and cost effective.

Proficy* Accelerator for Production Efficiency is a powerful, out-of-the-box software and services solution that can demonstrate results within 30 days. It's a low-risk, proven approach that leverages industry best practices and enables you to explore and evaluate the full functionality of Proficy.

Providing rapid critical insight into your operations, it can help you:

- Identify operational inefficiencies
- Perform root cause analysis
- Manage and improve production operations in real time

Capabilities

Proficy Accelerator for Production Efficiency combines our full-featured software and a rapid engagement model that allows you to make more informed decisions about your manufacturing processes.

- Provides visibility into factors such as equipment downtime, changeover effectiveness, waste, and line efficiency
- Supports root-cause analysis by automatically linking downtime events to a specific cause in real time
- Calculates KPIs and enables the creation of ad-hoc performance reports that can be shared via the web to help continuously improve production

It's easy to get started

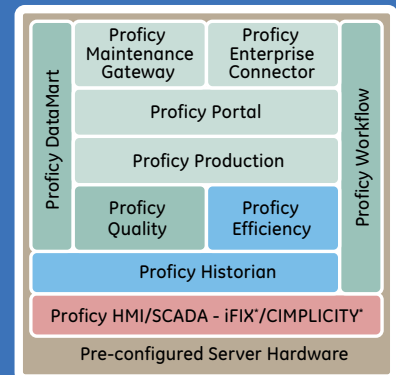

In 30 days, Proficy Accelerator for Production Efficiency can show you the value of our Proficy software. It's a smart and easy way to jump-start your Operational Excellence journey for a sustainable competitive advantage.

Contact your local sales representative, and we'll conduct a short assessment to confirm readiness for Accelerator or make recommendations to help you prepare. Then we'll work with you to rapidly deploy our software and help you prove its value within your specific business environment.

Start smart. Start quick. Start now.

Leveraging proven products, implementing best practices and expert services, GE Intelligent Platforms' Proficy Accelerator rapidly demonstrates the value of our Proficy software to launch your drive toward operational excellence.

Proficy Accelerator for Production Efficiency

About Accelerator

GE Intelligent Platforms' Accelerator solutions are out-of-the-box software applications and services combined into one convenient, low-risk, low-cost package. Accelerator leverages proven products and best practices to rapidly demonstrate the value of GE Intelligent Platforms' Proficy software, and combines the right blend of solution components for a specific industry application or process.

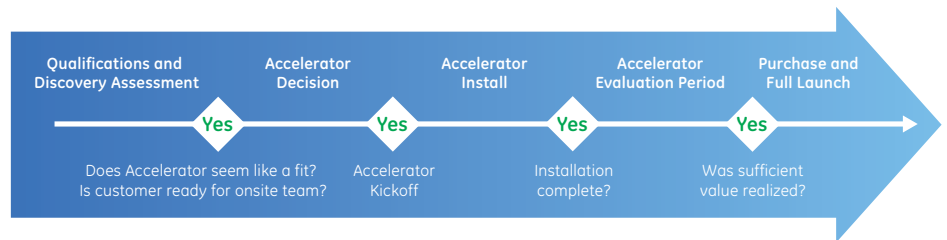

- Rapidly proves the value: Results faster than traditional projects for quick ROI.
- Delivers standard, configurable capabilities of Proficy: Avoids the cost and risk of custom coding or system development.
- Offers scalability and extensibility: Establishes a foundation that enables rapid expansion to other production lines and/or additional operations management functionality.
- Leverages proven expertise: Delivered by experts with deep operations management solutions experience.

In short, Accelerator gives you an easy way to get started, allows for future expandability and begins your Operations Excellence journey the right way.

What's included?

With Accelerator, you can fully understand and evaluate the power of Proficy with minimal upfront cost or risk of customization. Throughout your evaluation, you invest only in the services that help get you started. Accelerator includes:

- Access to the right mix of full-featured Proficy software components for your application
- A fixed set of services to install the system, train your team, and support you through the evaluation
- A structured and proven engagement model that leverages our best practices to accelerate results
- Availability of an entry-priced Server module, fully-featured for use with the production equipment included in the Accelerator pilot
- Availability of a pre-loaded, pre-configured server package to speed deployment
- Access to our world-class GlobalCare technical support to keep you up and running

Minimum requirements

- Automatic downtime and process data available as input signals to Historian
- Shop-Floor network and Production Data OPC Server accessible to Accelerator
- Availability of a reliable and secure remote connection to the servers
- Controller-level programming done by customer
- Shop-Floor OPC Server supplied by customer if required
